LinkedIn: *Coming Soon*

Skills

Full Stack knowledge (HTML, CSS, js, jQuery, Bootstrap, Node)

Data entry and analysis

Photoshop and Krita

Sales

Register use and money handling

Inventory Management

Proficient in Microsoft Word, Powerpoint, and Excel

Projects

Find a Beer API based website

This project was created in collaboration with github users @ and @. We created this site from the ground up with the use of 4 different APIs to locate local breweries and bathrooms in your area. The goal of our app was to help people plan their pub crawls. Deployed version [here](#), github page [here](#).

Weather App

I created this app so that users can get a detailed description of the daily weather as well as a 5 day forecast. Users can check out multiple cities and refer back to them easily as they are saved to the page. Deployed version [here](#), and github page [here](#).

Random Password Generator

This app allows users to create randomly generated passwords to keep all their important accounts secure. Deployed version [here](#), github page [here](#).

Experience

Haley's Dog Walking and Sitting Services / Founder

November 2019 -May 2020

After leaving my last job, many former clients wanted me to walk, watch and train their dogs, so I started my own dog walking company. I was the only employee and had 15 total clients. Sadly due to Covid-19 I lost all my clients in a matter of days, as they all began to work from home and cancelled longer trips. I still had some walks here and there but decided to officially "retire" in May. Many of my clients have become lifelong friends.

Healthy Spot / Certified Keyholder

October 2018 - November 2019, Playa Vista & Marina Del Rey

While my title was certified keyholder, I did many more jobs whilst working here. Namely, I served as a nutritional consultant on pet food, I had to complete training courses to educate and sell to the customers the right kind of food for their dog or cat. I also learned how to receive and manage inventory, as well as other regular retail duties, such as filling out orders, making calls, and maintaining, restocking, and cleaning the store. I grew a very loyal and satisfied customer base while at this position.

Forensic Anthropology Center / Lab Assistant

January 2015 - May 2015, Knoxville

As a lab assistant I was responsible for the care and cleaning of human remains donated to the center. I was the final stop before they went to the archive, so I had to make sure they were thoroughly cleaned and all the bones were accounted for and assigned to the correct donor number.

Education

University of California- Davis / Bachelors of the Art in Sociology, Law and Society

August 2016 - August 2018, Davis

I transferred from the University of Tennessee- Knoxville in the fall of 2016, and completed my degree in sociology here. With this degree I hope to one day go to graduate school, although at the moment I am not sure for what exactly. I gained many skills here, namely in data entry, data analysis, and statistical mathematics. I also greatly improved upon my scientific writing, and debate abilities.

Chaminade College Preparatory / High School Diploma

August 2011 - May 2014, West Hills

I graduated from high school and earned my diploma in 2014. I was a part of many clubs such as Speech and Debate, Key Club, and Future Doctors of America. During my time in Speech and Debate, one of my speeches made it to regionals in 2013.

Thank you for reading, have a wonderful day.
